

ALOHAPOOOLS[®]
HYDROTHERAPY

Aloha Pools has over 58 years of experience in the pool industry and we've become renowned for our expertise in the hydrotherapy, wellness, and rehabilitation space. We're capable of delivering on every component of high-end residential and commercial construction. Because our team know the complex regulations of hydrotherapy pools extensively, we work closely with the architectural engineers to present a fully compliant, yet beautifully crafted pool.

Hydrotherapy is a holistic whole-body therapeutic treatment that involves movement and weightless exercise in water. Essentially, it’s physiotherapy in a pool.

What is Hydrotherapy?

Hydrotherapy is a holistic, whole-body therapeutic treatment that involves movement and weightless exercise in water. Essentially, it’s physiotherapy in a specialised pool.

The Differences

Distinguishing hydrotherapy pools from conventional ones is in the meticulous coordination of factors such as temperature, pressure, water movement, safety features and equipment configuration. The pool is specifically tailored to accommodate the individual or organisations therapeutic objectives.

The Benefits

Leading health care professionals have noted countless benefits of hydrotherapy. People in water effectively become lighter, making it much easier to move. The warm water elevates body temperature, enhances blood flow throughout the circulatory system and in turn provides relief from pain. This improved circulation promotes the healing process of injured tissues, facilitates the rehabilitation of damaged muscles or joints, and builds a greater range of movement and strength. More generalised benefits that have been noted are improved mood, sleep, fitness and help with weight loss, especially when movement would otherwise be difficult. More people need these added benefits when considering a pool, especially in high-performance centres for elite athletes.

The Experts

Aloha Pools has over 58 years of experience in the pool industry and we’ve become renowned for our expertise in the hydrotherapy, wellness, and rehabilitation space. We’re capable of delivering on every component of high-end residential and commercial construction. When it comes to hydrotherapy pools, there are several factors to consider: Water quality, access, safety, risk management and numerous compliance requirements. Because our team know these regulations extensively, we work closely with the architectural engineers to present a fully compliant, yet beautifully crafted pool.

Our Experience

Our Experience includes, Aged Care and Premium Retirement Living, Rehabilitation Facilities, Hospitals and Palliative Care, High Performance Training Centres, like the home of the Matilda’s, Special Development Schools and Wellness Pools. We can also create something special for our clients who simply want the benefits of a hydrotherapy pool but with the feel and ambience of a wellness pool. Having built some of Australia’s most complex pools, the processes and checklists our team have in place for our hydrotherapy pools have become second nature to us.

Beautifully Crafted Pools

As experts in the hydrotherapy and rehabilitation wellness space, it’s really been our pleasure to create beautifully crafted pools that give dignity, care, elite recovery and training, and a restorative experience to those who need it the most.

ALOHA POOLS

“

As experts in the hydrotherapy and rehabilitation wellness space, it’s really been our pleasure to create beautifully crafted pools that give dignity, care, elite recovery and training, and a restorative experience to those who need it the most.

”

Travis Fell – Owner

CRAFTING POOLS SINCE 1966

The Fell family has always loved the swimming pool. For more than 58 years they’ve been in business, first as Lindsay Fell Pty Ltd, a general landscape construction business, and then as Aloha Pools.

It was the 1970’s when Greg foresaw the coming change in the swimming pool industry. No longer was the pool going to be only for a privileged few – the market was opening to the wider community. So, when Lindsay passed the family business on to his son, Greg focused specifically on swimming pool and spa construction, honing his skills in every aspect of the construction process for the next 48 years.

Greg’s son Travis joined the business, marking three generations of pool builders. Travis accelerated the growth of the business and enabled the Aloha Group to grow into a fully integrated construction conglomerate capable of delivering on every component of high end residential and commercial construction. Travis’ determination has allowed the Aloha Group of businesses to grow into a team of over 80 design and construction professionals, all employed in-house.

OUR WHOLE IS GREATER THAN THE SUM OF ITS PARTS

Unlike many construction companies, we have assembled our own in-house team of over 80 design and construction professionals. This is unique, particularly in our industry. We understand that not every tradesperson is created equal, that's why we are intent on finding the right people, training them, investing in them and allowing them to thrive in a supportive environment. Their continued development in understanding technical details and hands-on construction skills means that you will see that we don't just make a pool, we craft it.

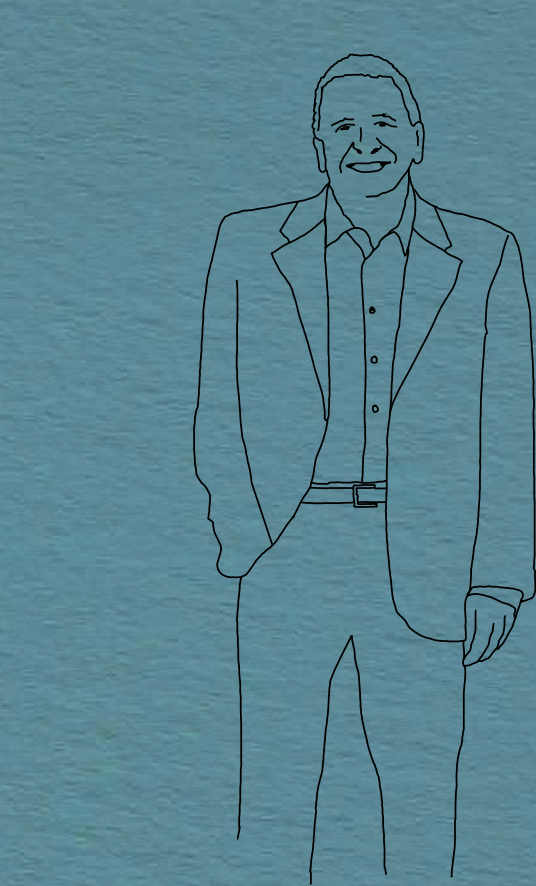

Our collective team of consummate design and construction professionals understands exactly what is required to create and craft a project. Together we work to control every moving part, which gives us a unique point of differentiation and competitive advantage. From design to construction and project management, right down to pool maintenance, we handle every stage of the process. Together we rise to meet the most demanding of projects. Together we succeed.

MEET YOUR WINNING TEAM

Greg Fell
Second generation, Director

Greg was just past his teenage years when he established Aloha Pools. He worked tirelessly to build a company that would a construction skills and evolve his business structure. With more than 48 years of experience under his belt, Greg’s comprehensive understanding of design and focus on the end-user experience provides a strong reference point within the Aloha Group.

Travis Fell
Third generation, Director

Swimming pool construction started to change in the mid-1990s and Travis, with a vision of what could be created, was at the forefront of cutting-edge design and low maintenance swimming pools. Since then, he has driven the Aloha Group into a vertically aligned specialist swimming pool company, encompassing all aspects of construction in-house. Travis’ personable nature makes him a natural leader within the group, and his understanding of construction and technical details, fused with a strong architectural vision, earns him respect at every consultation.

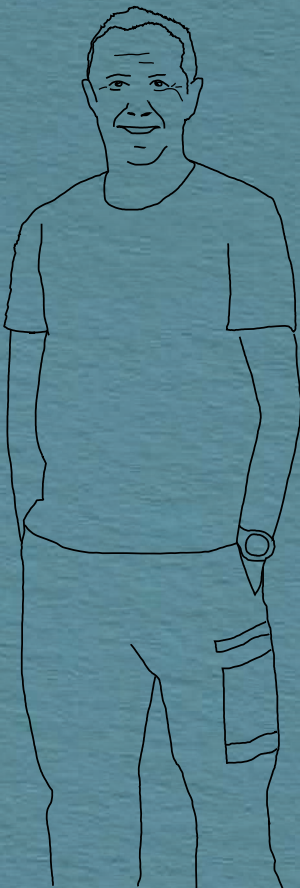

Jaden Tauren
CEO

As Greg and Travis continued to grow the Aloha group, the need for a general manager naturally evolved. So, in 2009, they welcomed Jaden to the team, who brought with him a unique administrative skill set. Just as every project requires a skilled tradesman to execute the details, every business requires strategy and direction, and Jaden’s leadership in these areas afforded the Aloha group the room to craft, to succeed.

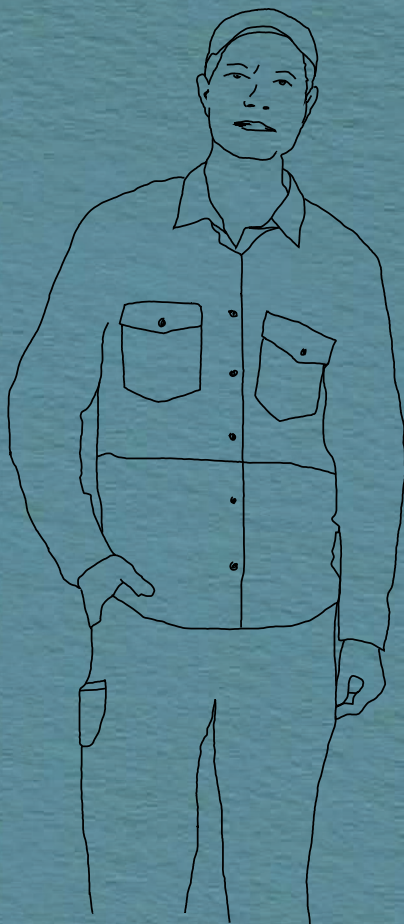

Steve Kimpton
Site Supervisor

Steve met Travis in the mid-1990s at night school, where they both completed their Associate Diplomas in Building Construction. Just a few years later, Steve joined the Aloha family and for 25 years he has been directly accountable as Aloha Pools’ lead site supervisor. Steve has developed an in-depth knowledge and skill base that few can replicate, and his passion for outcomes drives his determination to ensure each project is completed to meet the expected standard of the company.

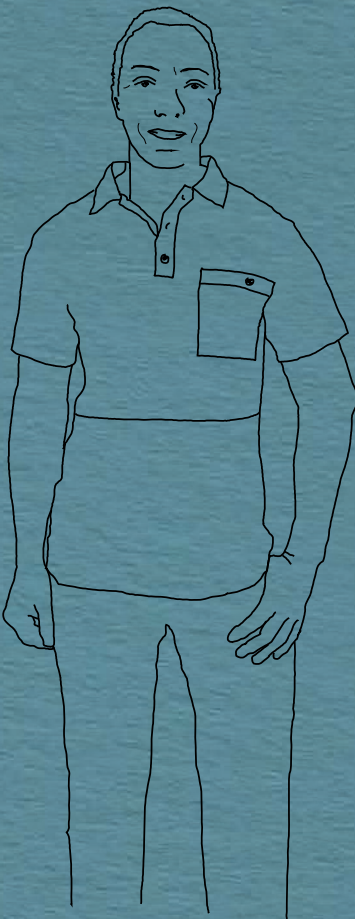

Jeff Cashen
Lead Tiler

Tiling is where pool construction comes together—let’s face it, it’s the part we all see, the part where planning, process and vision culminates into its form. There is a particular honesty with tiling because water, as we’ve come to respect, has a magnifying effect. Jeff understands water and he is an expert at his trade. He was taught by his father, Brian, who worked at Aloha Pools for decades. Now Jeff’s refined craftsmanship, dedication and patience are qualities he instils in those who work alongside him.

Frank Fantini
Structure Foreman

Heading up Aloha’s steel fixing and formwork crew for over 15 years, Frank’s nose to the grindstone approach is exactly what is needed to achieve the results his team does. His strength, flexibility and mental desire are unassuming and the mark of a true gentleman and master craftsman.

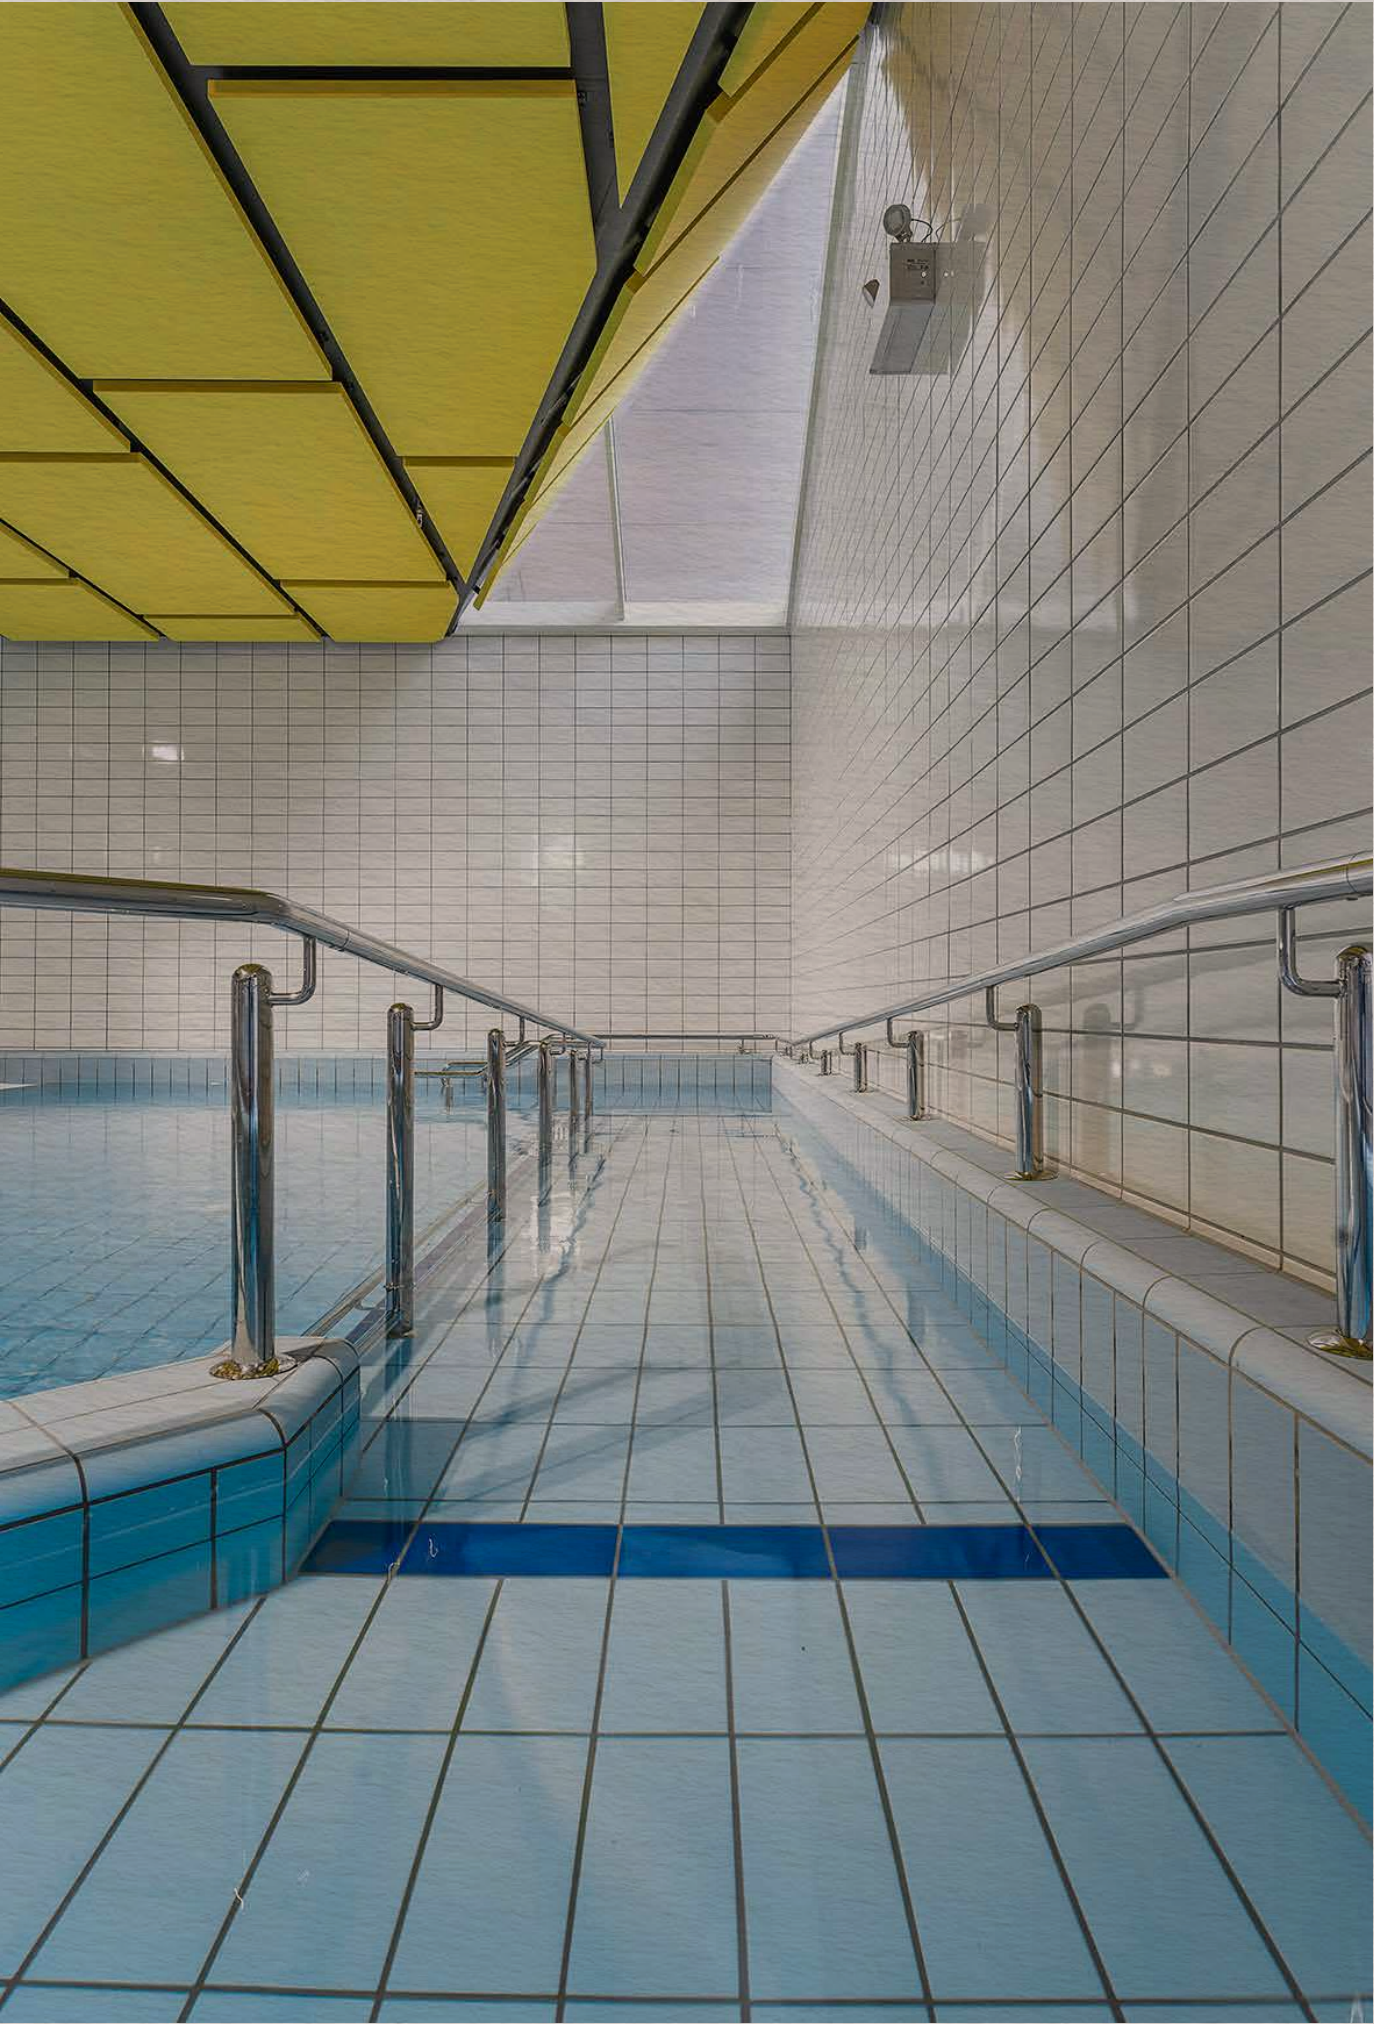

Ray Taylor
Plumbing Foreman

It takes a special kind of tradesperson to enjoy hidden work. Yet, for over 16 years at Aloha, Ray has done just that. Given that most of his labour is buried or tucked away in a plant room, Ray’s continued pride in precise workmanship is more of an exception than a rule today. Evident in each pipe and weld that Ray and his team undertake is the knowledge that it will remain true and uncompromised for the life of the product.

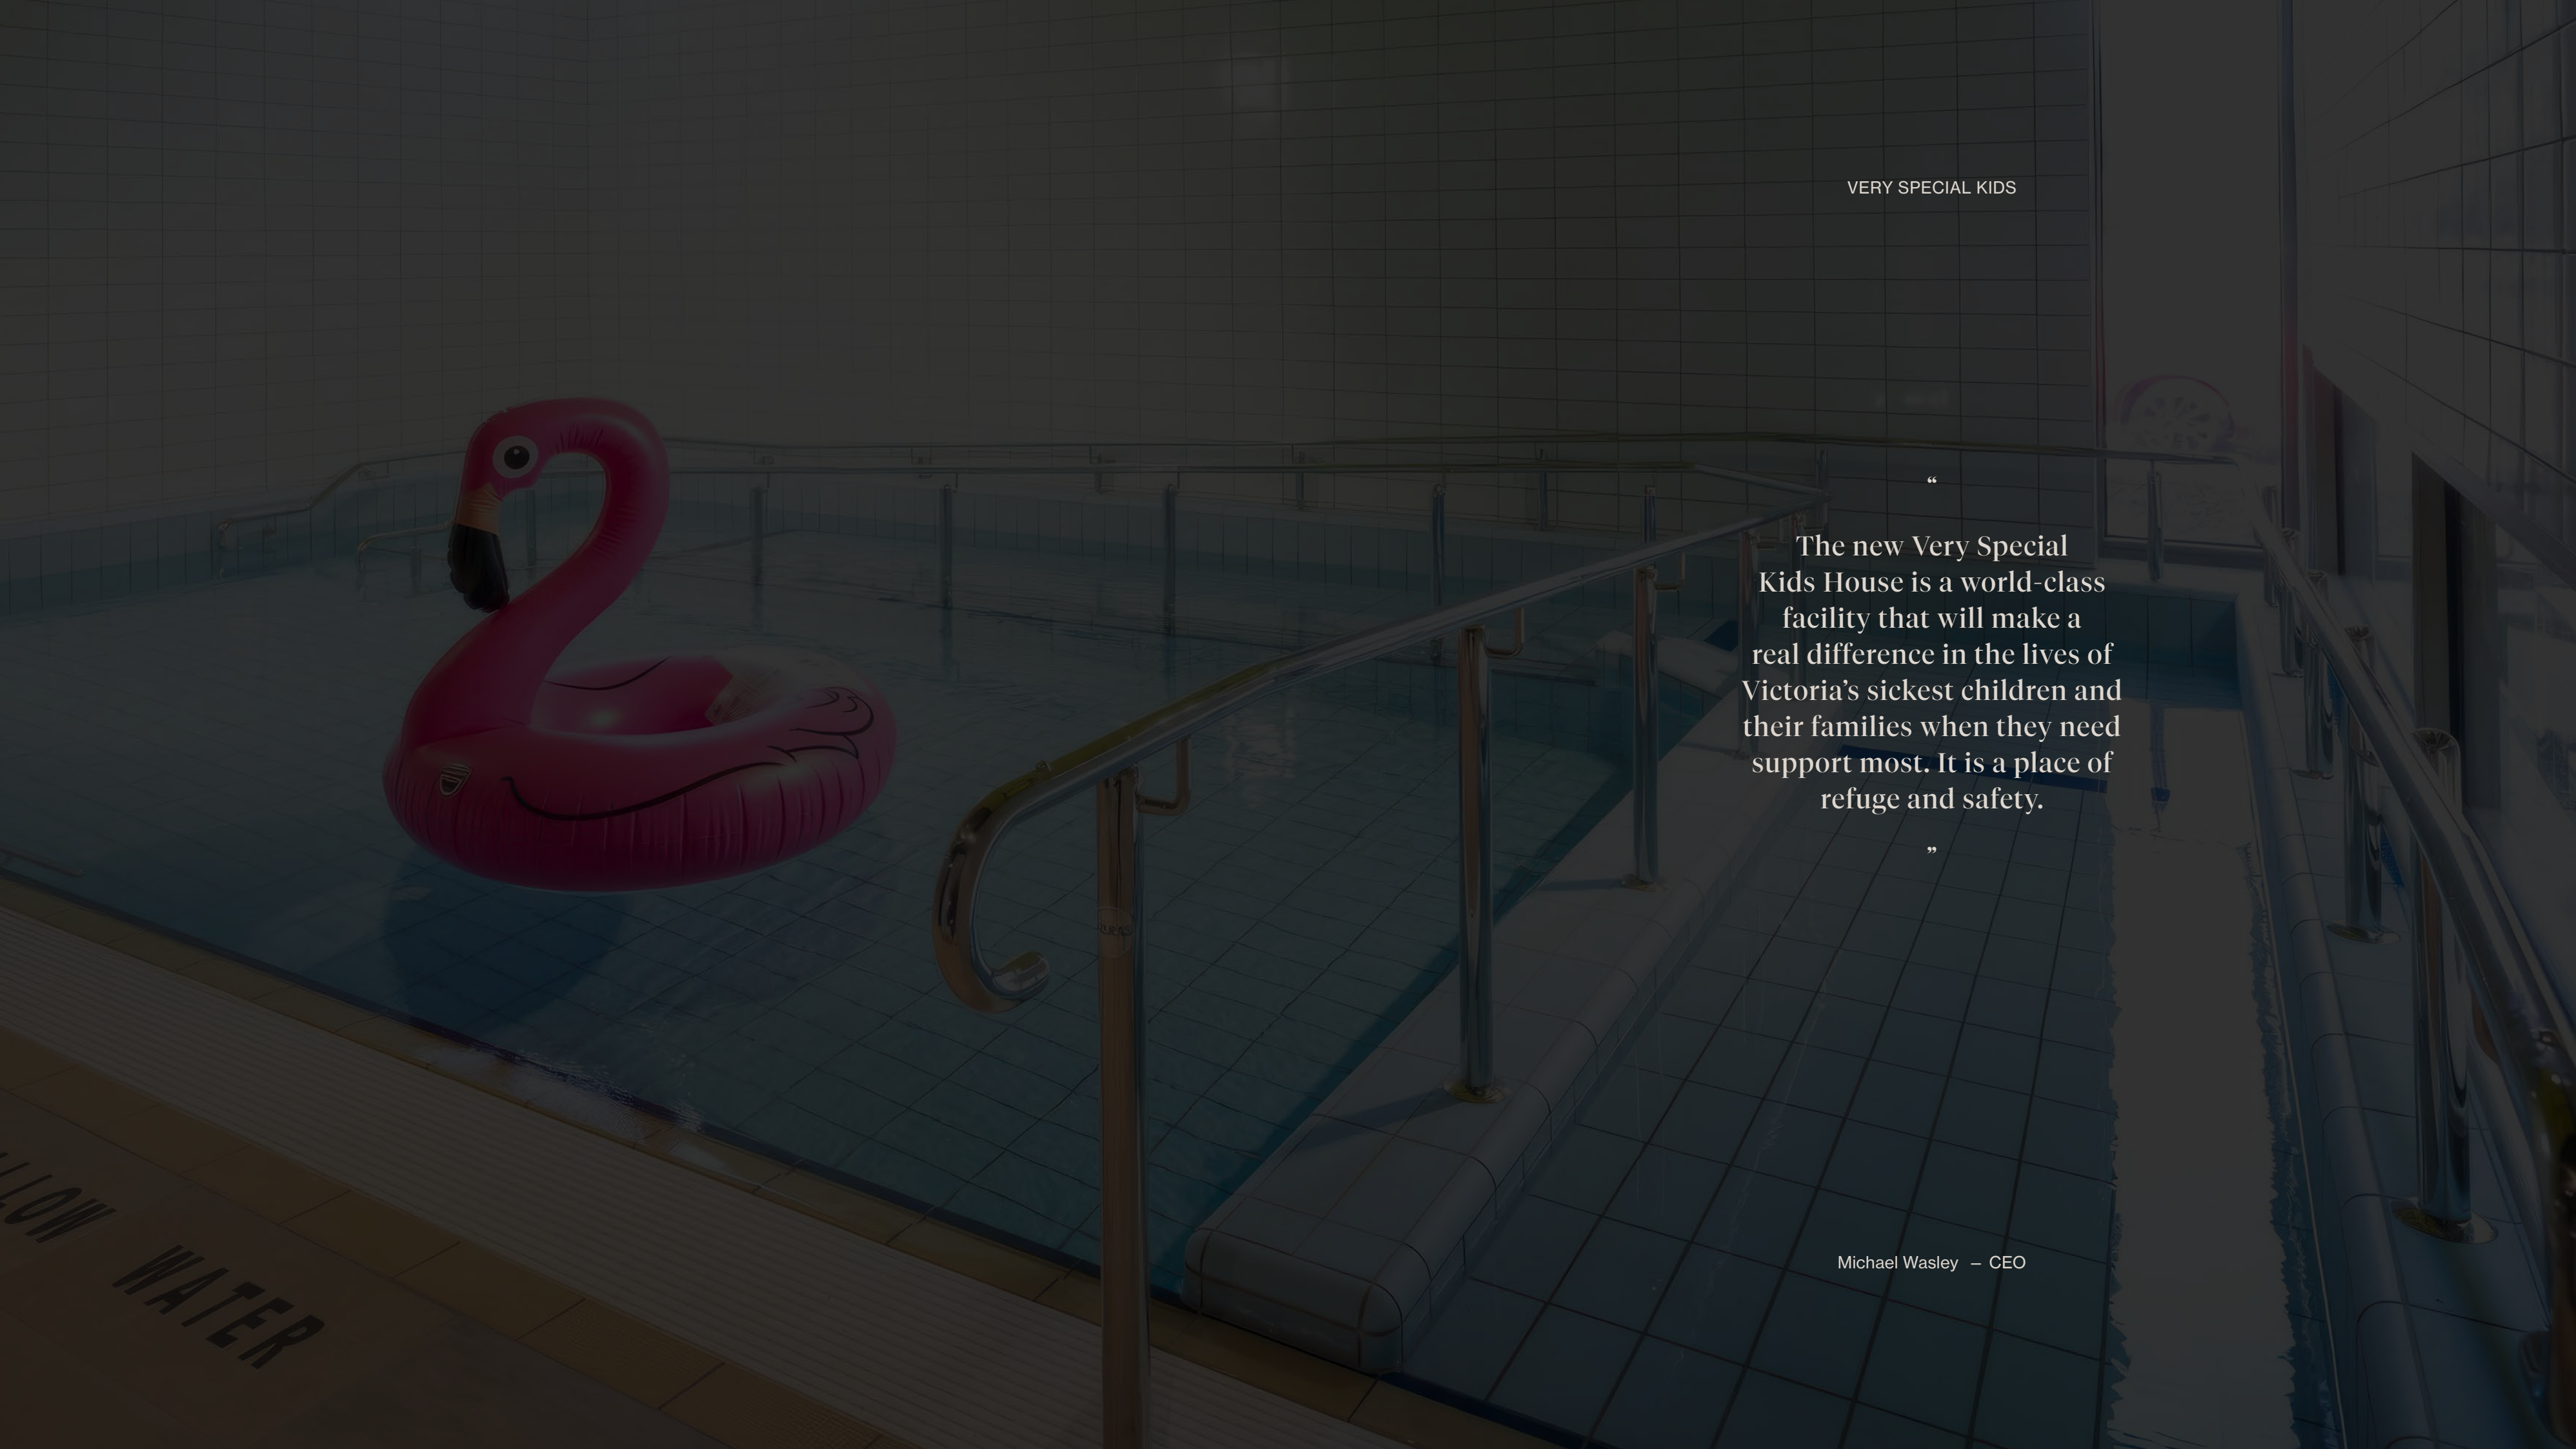

VERY SPECIAL KIDS HOUSE

When a child stays at the Sister Margaret Noone Hospice at Very Special Kids House they can have access to a selection of fun, engaging and therapeutic activities. During respite stays, children can utilise the hydrotherapy pool in individualized aquatic physiotherapy sessions. The pool is maintained at 34 degrees and is just over one meter deep, accessible via a hoist or water wheelchair-friendly ramp. Leading health care professionals have noted that Aquatic physiotherapy can foster a sense of freedom, increase independence, reduce stiffness and tension, offer pain relief, strengthen muscles, improve fitness and social interaction. Additionally, it can have a calming effect for children with sensory processing disorders and reduce stress from overstimulation.

VERY SPECIAL KIDS

“
The new Very Special Kids House is a world-class facility that will make a real difference in the lives of Victoria’s sickest children and their families when they need support most. It is a place of refuge and safety.
”

Michael Wasley — CEO

HOME OF THE MATILDA’S

The Home of The Matildas, the largest-ever government investment in an Australia-specific football project, is located within the La Trobe University Sports Park. This world-class precinct integrates teaching, research, community participation, and elite sport. The Sports Park features a state-of-the-art recovery and wet area with hot and cold plunge pools, as well as an Endless River pool with swimming jets. The key advantage of the river pool lies in its suitability for resistance training. Dynamic, high-velocity end jets generate a robust river current, propelling athletes through rigorous training regimens. Maintaining a comfortable 28 degrees Celsius, the River Pool provides an optimal training environment, while the pool spa offers a soothing retreat at 34 degrees Celsius. For those seeking a refreshing plunge, the invigorating cold pool awaits at a brisk 10 degrees Celsius.

The facility is designed to accommodate elite-level training and recovery in a wet area featuring three distinct bodies of water: a Cold Pool with a 1-hour turnover, a Hot Pool with a 30-minute turnover, and a River Pool with a 1-hour turnover.

FOOTBALL VICTORIA

“
It is our hope The
Home Of The Matildas
becomes more than just
a football precinct and
that it becomes a symbol of
empowerment, opportunity,
and equality. It sends a
powerful message to the
world that in Australia,
we value and celebrate
female talent
and achievement.
”

Mandy McCarter – Football Victoria Head of Marketing

THE INTERLUDE PENTRIDGE

The transformation of Melbourne’s historic Pentridge Prison site into a one-billion-dollar dining and entertainment precinct was something of a passion project for the developers. Inside the Victorian bluestone walls is the exclusive underground sanctuary pool for premier guests. Deliberately designed to contrast and complement the 170-year-old heritage site, visitors are treated to a unique experience, offering a space to rest, reflect, and float. Surrounded by candlelight, guests can step into the warm Relaxation Wellness Pool, with a temperature set to provide therapeutic benefits during the experience.

RAELENE BOYLE RETIREMENT VILLAGE

Where community takes centre stage, the pool and therapeutic spa at the Raelene Boyle Retirement Village go beyond mere amenities, fostering a profound sense of togetherness, well-being, exercise, and the tranquility of easy living for its aged care residents. Prioritizing safety in the pool and spa design was paramount. Non-slip “C”- rated swimming pool tiles grace the steps throughout the pool and spa floors, chosen specifically for their safety features, cleanliness, and ease of maintenance. LED lighting is integrated throughout the pool, along with edge tile markings on the pool steps.

Addressing the needs of residents with varying abilities, the swimming pool was meticulously crafted with a focus on accessibility, featuring mobility-compliant handrails that extend just below the waterline into a perimeter activity grab-rail, proving invaluable for programmed group activities. The design also incorporates a DDA-compliant pool hoist for those with limited movement.
